Doctor is our profession, Medicine is our mission!
Stavropol State Medical University was founded in 1938. University graduates work in every corner of our country, they head the departments in the alma mater and other universities, are the leaders of health institutions and research institutes. For all years of its existence StSMU trained more than 31,000 doctors.

Unique to the South of Russia, Center of practical skills, equipped with the latest technology gives the opportunity for students to work with the phantoms and dummies of expert class. The clinical training of students takes place on the basis of 28 medical institutions of Stavropol, its own clinical departments: Eye Microsurgery Clinic, Border States Clinic, Endoscopic and Minimally Invasive Surgery Clinic, as well as dental clinics. In the course of practical training the future doctors comprehend all the minutest details of the profession.
If you want to become a doctor, it does not mean you have to forget about your hobbies. At our university it is possible to combine it very easily!

Four StSMU buildings are equipped with modern training and medical equipment, computer classrooms, electronic library. Research is one of the components of learning and the opportunity for students to discover the prospects for future career growth. The most important element of the infrastructure of the university is a Center of scientific and innovative development, which consists of six laboratories. To date, the university has developed several scientific schools: surgical, gastroenterology, infectious disease specialists, otolaryngologists, psychiatrists and clinical psychologists, pharmacologists. Many departments have scientific societies in which you can realize yourself as a young scientist of our university, and possibly win the competition and get a grant to bring your ideas to life.

In the university you can do vocals, performing arts, dance, folklore, play KVN team, become a volunteer or to prove yourselves in the sport. StSMU has a 25-meter long swimming pool, two gyms, three training rooms, outdoor basketball court.

The students are provided with places in hostels (they are 4 in the university). Furnished rooms are designed for 2-3 people; kitchens are equipped with all necessary equipment.
So, you chose the difficult but wonderful medical profession. And now is the time to decide what field of medicine you’re interested.

**General Medicine Faculty**

Qualification «Physician» in specialty «General Medicine» is awarded.
Form of study: full-time, 6 years.

General Medicine is a field of medicine that covers the health problems of people of 18 years of age or older, except for dentistry.

Faculty trains doctors for medical care of the adult population in various areas.

Undergraduates can learn the disciplines of obstetrics, gynecology, neurology, urology, traumatology, dermatovenerology, otolaryngology, ophthalmology, phthisiology, psychiatry, clinical pharmacology, forensic medicine, physical therapy, which will help you later decide on a specialization.

**Faculty of Pediatrics**

Qualification «Pediatrician» in specialty «Pediatrics» is awarded.
Form of study: full-time, 6 years.

Pediatric service covers all child population aged from birth to 18 years. The Faculty trains doctors for medical care of children in various fields with the ability to specialize in any area of health, except for dentistry.

In the third year you will start to study children and internal medicine propaedeutics, general surgery, and in the fourth year the primary learning process moves to the clinical departments located in hospitals and clinics.

**Faculty of Dentistry**

Qualification «Dentist» in specialty «Dentistry» is awarded.
Form of study: Full-time, 5 years.

Training of dentists takes place on the basis of StSMU dental clinics, city polyclinics and dental hospitals with the possibility of further specialization in therapeutic dentistry, prosthetic dentistry, dental surgery, maxillofacial surgery and pediatric dentistry.

Bases of the Faculty have modern equipment, specialized operating rooms, where all kinds of qualified dental care are rendered.
Foreign Students’ Faculty

In 1961, Stavropol State Medical University started admitting foreign students and since that time more than 1700 physicians, residents and fellows from 82 countries of Europe, Asia, Africa and Latin America have graduated from the University.

Stavropol State Medical University is one of the few Russian medical universities recognized by the Medical Council of India. The University is listed in the World Directory of Medical Schools published by the World Health Organization (WHO) which enables our graduates to hold a job in any country of the world after taking national examinations.

Our graduates work in different places of the world; they are the trademark of the Faculty. Many of them head scientific research institutes, laboratories, faculties and higher school chairs.

Nowadays, more than 500 foreign students from 34 countries of the world are trained at three faculties of the University: General Medicine, Pediatrics and Dentistry. There are the Preparatory Courses, too. The post-diploma training is a fellowship program, due to which graduates can improve their theoretical and practical skills; it plays a great role in the improvement of skills of physicians.

English-speaking foreign students are taught in English that enables them to begin studies without preliminary training at the Preparatory Courses.

The foreign students are encouraged to participate in different research projects, working within the “Students and Young Researchers Society” showing their results at annual conferences and often winning prizes in all-Russian or international fora.

The University has all conditions necessary for successful acquiring of medical knowledge. The foreign students individually perform laboratory and clinical tests and take advantage of modern learning technologies. With transition to the general practitioners’ training, they spend more time in the outpatients’ departments where they get acquainted with the work of healthcare organization, see patients, learn emergency medicine and assist in various diagnostic procedures.
Here you came to the last step, a little more – and you’re a student of Stavropol State Medical University! Read carefully this important information, it will help you to orient yourself at admission.

**Application deadline**

Admission of documents for the first year begins on June 19, 2015.

So, you have chosen the difficult but wonderful medical profession. A long and difficult path is ahead of you, and we can help you in the very beginning...

Small Medical Academy

Since 2010, for all schoolchildren StSMU has opened Small Medical Academy, created by the decision of the Academic Council. Training in SMA is an opportunity for schoolchildren of the 9-11 grades to get acquainted with the medical profession and to acquire the skills of research activities, meet with prominent scientists, clinicians, learn about the past and the future of medicine, visit the departments and museums of StSMU, adapt to training conditions in high school. Training in SMA is free of charge for all schoolchildren.

Preparatory courses

In addition to SMA, the University admits schoolchildren to the training courses of the Faculty of Pre-University Education, which can help you to enroll in the University on basic subjects: chemistry, biology and Russian.

You can choose subjects of study. Following the results a mock exam is held (in a form of the General State Exam, or in a traditional form), which is not the entrance examinations to StSMU.

Training at the preparatory courses is paid. Students are offered a choice of forms of training with different terms.

There are up to 15 people in each groups, in «Private Tutor» groups – 3-5 persons.
